Summary

AI Data Annotator with 10+ months of experience delivering high-accuracy data labeling, conversational AI evaluation, and quality assurance across text, image, and audio modalities, including multilingual datasets in Hindi, English, and Telugu. B.Sc. Information Technology graduate (2025), currently pursuing M.Sc. IT with a work-integrated OJT track. Experienced in applying RLHF/RLSF methodologies and rubric-based evaluation across medical, educational, and customer service domains, with a consistent record of meeting throughput and quality targets in structured, guideline driven environments.

Skills

Linguistic Skills: Native Hindi, Fluent English, Fluent Telugu

Technical Skills: Data Annotation, RLHF, RLSF, Data Labelling, Annotation QA/QC, Text/Image/Audio Annotation, Conversational AI Testing, Intent & Dialogue Labeling, Customer Sentiment Analysis, Image Classification, Bounding Boxes, Prompt Engineering, Basic AI/ML Concepts, HTML5, CSS3, JavaScript, Python, Java, MySQL, Networking, UI/UX Design

Tools & Platforms: VS Code, Git/GitHub, Netlify, Apache Tomcat, Hugging Face, Microsoft Office Suite, AWS Basics, Supabase

Soft Skills: Exceptional Attention to Detail, Problem-Solving, Clear Communication, Time Management, Cultural Awareness, Team Collaboration.

Work Experience

AI Data Annotator(Freelance)

Jan 2026 – Present

Uber AI Solutions

Remote

- Conducted high-precision audio annotation and quality evaluation to support AI model training, maintaining strict guideline adherence across multilingual datasets.
- Consistently met daily throughput and quality KPIs while delivering reliable annotation outputs in a remote, fast-paced environment.

RLHF Contributor (Freelance)

Jan 2026 – Present

Prolific

Remote

- Evaluated multi-turn conversational AI responses for intent accuracy, tone, and guideline compliance to support model safety and reasoning improvements.
- Generated high-quality human feedback data through structured response evaluation, consistently tracking output against quality targets.

Image Annotator (Freelance)

Oct 2025

clickworker

Remote

- Executed detailed image annotation tasks including categorization, labeling, and bounding box creation for machine learning datasets.

Annotation/QA Specialist (Freelance)

Sep 2025 – Jan 2026

DataAnnotation Tech

New York, USA (Remote)

- Specialized in RLHF/RLSF methodologies, rubric-based evaluations, and response ranking in Hindi, English, and Telugu across medical, educational, and customer service domains.
- Flagged compliance and policy issues while delivering culturally nuanced, linguistically accurate annotations that supported multilingual model development.

Extracurricular Activities & Achievements

- **ECSOC Contributor** (Jul 2026 – Present): Contributing to coding challenges and collaborative initiatives.
- **Rewriting the Code (RTC) - Community Member** (Jun 2026 – Present): Active in Women in Tech community for networking and skill-building.
- **Hackathon Participant**: PromptWars, Vibe2Ship (CodeNinjas x Google), Outlier AI CodeCircuit – Built multiple full-stack AI/web applications under time constraints.

Projects

LiScore | *React, Vite, TypeScript, Bun, Netlify* **MSc IT Research Project**

- Building an AI-powered license health scanner that evaluates GitHub repositories and generates a 0–100 / A–F compatibility score with detailed reports and embeddable badges.
- Implemented real-time repo scanning for licenses, dependencies, and SPDX headers; deployed on Netlify.
- Extending into a full License Integrity Monitor with change tracking, drift detection, and GitHub Action integration.

SocialEye | *Next.js, Supabase, Netlify* **Vibe2Ship Hackathon (CodeNinjas x Google)**

- Built an AI-Powered Hyperlocal Civic Issue Reporting & Resolution web application.
- Implemented user authentication, profile management, and real-time issue tracking using Supabase.
- Emphasized community-driven problem solving with clean, responsive UI/UX.

CalmPrep | *React, Supabase, Netlify, Ollama* **PromptWars Hackathon**

- Developed an AI-powered mental wellness assistant designed specifically for students during high-stakes exams.
- Integrated modern tech stack with Supabase backend and deployed on Netlify with SSR configuration.
- Focused on providing accessible mental health support through AI-driven interactions.

CarbonLens | *TypeScript, Vite, Netlify* **Online PromptWars Hackathon**

- Developed a personal carbon footprint tracker web application.
- Implemented features for tracking and visualizing personal carbon emissions with a modern, responsive UI.

TravelChecklist | *HTML5, CSS3, JavaScript, Netlify* **Outlier AI CodeCircuit Hackathon**

- Designed a user-friendly, culturally sensitive travel packing checklist web application.
- Implemented responsive design, accessibility features, and deployed on Netlify.

Education

Master of Science, Information Technology **2026 – Present**
DG Ruparel College of Arts, Science and Commerce *Mumbai, India*

Bachelor of Science, Information Technology **2022 – 2025**
VIVA College (University of Mumbai) *Mumbai, India*

– CGPA: 8.2 / 10

Higher Secondary Certificate (HSC) in Science **2020 – 2022**
Utkarsha Vidyalaya & Junior College *Mumbai, India*

Certifications

- **McKinsey Forward Program** — McKinsey & Company (Jun 2026)
- **Technical Support Fundamentals** — Google (Sep 2025)
- **AWS Cloud Practitioner Essentials** — AWS (Jul 2025)
- **MERN Stack Development** — edba academy (May 2025)
- **Cloud Computing Workshop** — IIT Bombay (Dec 2024)
- **AWS APAC Solutions Architecture Job Simulation** — Forage (Jun 2024)
- **Deloitte Australia Technology Virtual Internship** — Forage (Jan 2024)
